

# **Celestial Calculations: A Gentle Introduction to Computational Astronomy**

## **Consolidated Errata**

September 21, 2020

Thanks to all who've contributed to this errata list. Just when you think you've found the last mistake...!

The author can be contacted at [jllmitpress@gmail.com](mailto:jllmitpress@gmail.com) should additional errors be found in the book requiring this errata list to be updated.

### **Chapter 3: Time Conversions**

**Page 47, section 3.9, step 4:** the parenthetical note is incorrect. It should read “Note that adding 24<sup>h</sup> means that the resulting LCT is for the *previous* day while subtracting 24<sup>h</sup> means that the resulting LCT is for the *next* day.”

**Page 47, section 3.10:** A note should be inserted before the first paragraph. “Note: The time conversion method presented in this section is accurate to approximately a tenth of a second.”

**Page 48, section 3.11:** A note should be inserted before the first paragraph. “Note: The time conversion method presented in this section is accurate to approximately a tenth of a second.”
